

BAKING APPARATUSES AND METHODS OF USE

ABSTRACT OF THE DISCLOSURE

The present invention is directed to baking apparatuses that are adapted for use in baking cakes, custards and other dishes that involve the use of a water bath. In a disclosed embodiment of the invention a baking apparatus is disclosed that includes an inner and outer pan, which may be formed as an integral unit. The outer pan is preferably adapted to receive and hold water and the inner pan is adapted to receive a springform containing a cheesecake batter or other mixture. The side or sides of the inner pan are preferably watertight and prevent leakage of water into the inner pan. The present invention offers the advantage of water bath baking without the problem of water from the bath leaking into the springform that contains the cake batter.
